

A misty landscape featuring a pond in the center, surrounded by lush green grass and trees. The scene is hazy, with the background trees and sky obscured by a light fog. The text 'Country Meadows Computer Club' is overlaid in a large, red, 3D-style font with a white outline, slanted across the upper portion of the image.

# Country Meadows Computer Club

# LibreOffice

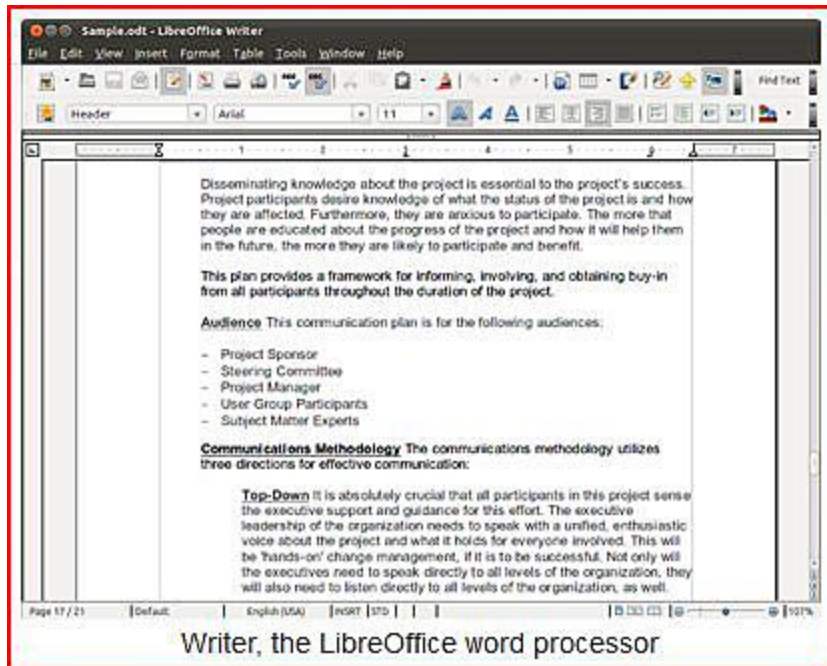

Writer – Draw – Calc – Impress – Base Math – PDF File Creator

Where can I get it **FREE**? <http://www.libreoffice.org>

	LibreOffice	Microsoft Office	Microsoft Works
Price	FREE	\$149.99	\$39.95
Word Processor	✓	✓	✓
Spreadsheet editor	✓	✓	✓
Presentation creator	✓	✓	No
Drawing Tool	✓	✓	No

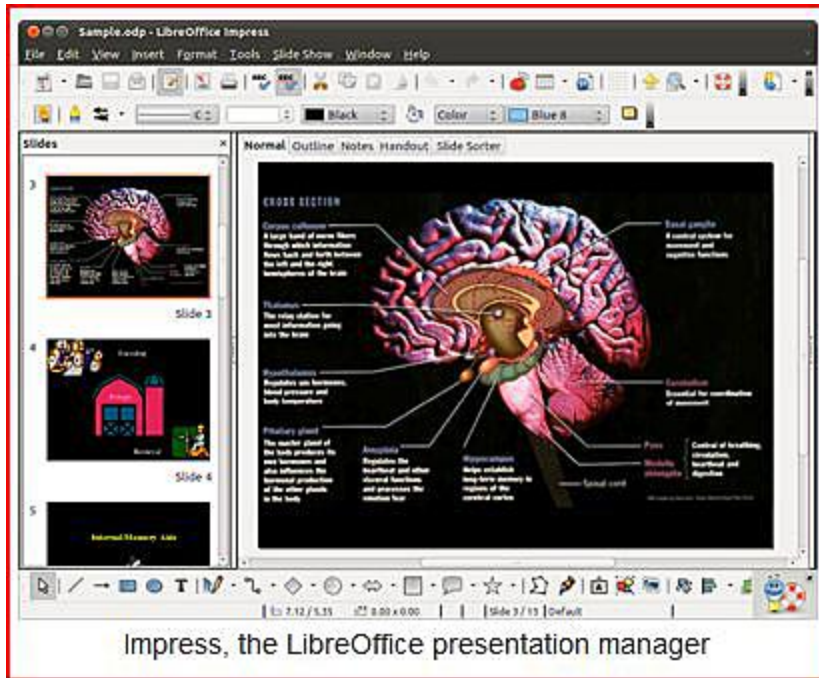

# What does LibreOffice give you?

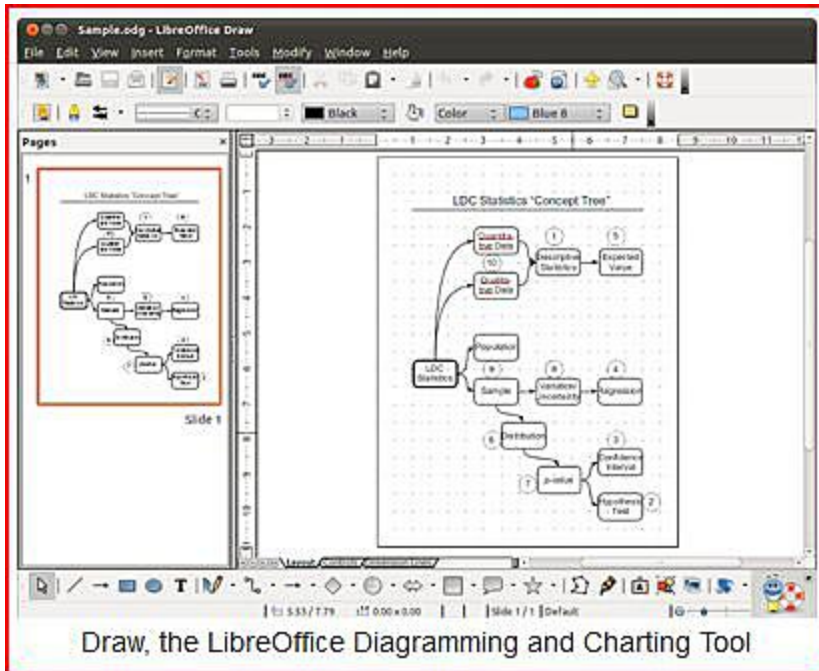

[Writer](#) is the word processor inside LibreOffice. Use it for everything, from dashing off a quick letter to producing an entire book with tables of contents, embedded illustrations, bibliographies and diagrams. The while-you-type auto-completion, auto-formatting and automatic spelling checking make difficult tasks easy (but are easy to disable if you prefer). Writer is powerful enough to tackle desktop publishing tasks such as creating multi-column newsletters and brochures. The only limit is your imagination.

**Calc** tames your numbers and helps with difficult decisions when you're weighing the alternatives. Analyze your data with Calc and then use it to present your final output. Charts and analysis tools help bring transparency to your conclusions. A fully-integrated help system makes easier work of entering complex formulas. Add data from external databases such as SQL or Oracle, then sort and filter them to produce statistical analyses. Use the graphing functions to display large number of 2D and 3D graphics from 13 categories, including line, area, bar, pie, X-Y, and net – with the dozens of variations available, you're sure to find one that suits your project.

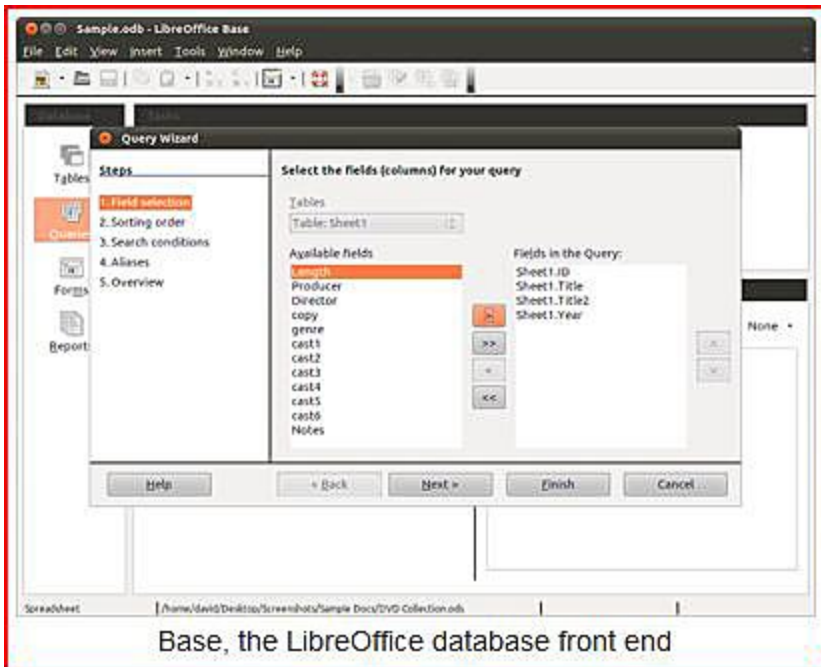

Impress is the fastest and easiest way to create effective multimedia presentations. Stunning animation and sensational special effects help you convince your audience. Create presentations that look even more professional than the standard presentations you commonly see at work. Get your colleagues' and bosses' attention by creating something a little bit different.

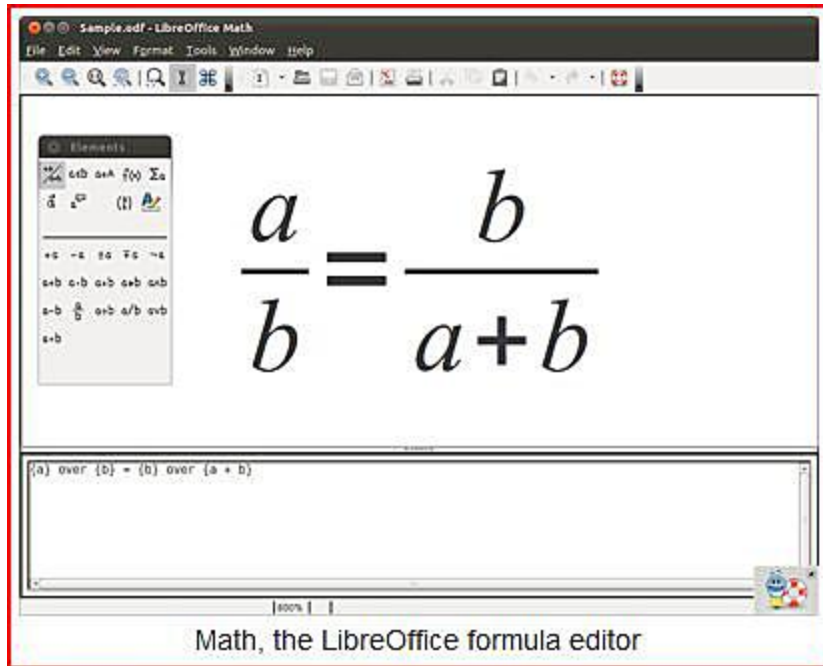

**Draw** lets you build diagrams and sketches from scratch. A picture is worth a thousand words, so why not try something simple with box and line diagrams? Or else go further and easily build dynamic 3D illustrations and special effects. It's as simple or as powerful as you want it to be.

**Base** is the database front-end of the LibreOffice suite. With Base, you can seamlessly integrate your existing database structures into the other components of LibreOffice, or create an interface to use and administer your data as a stand-alone application. You can use imported and linked tables and queries from MySQL, PostgreSQL or Microsoft Access and many other data sources, or design your own with Base, to build powerful front-ends with sophisticated forms, reports and views. Support is built-in or easily addable for a very wide range of database products, notably the standardly-provided HSQL, MySQL, Adabas D, Microsoft Access and PostgreSQL.

Base, the LibreOffice database front end

**Math** is a simple equation editor that lets you lay-out and display your mathematical, chemical, electrical or scientific equations quickly in standard written notation. Even the most-complex calculations can be understandable when displayed correctly.  $E=mc^2$ .

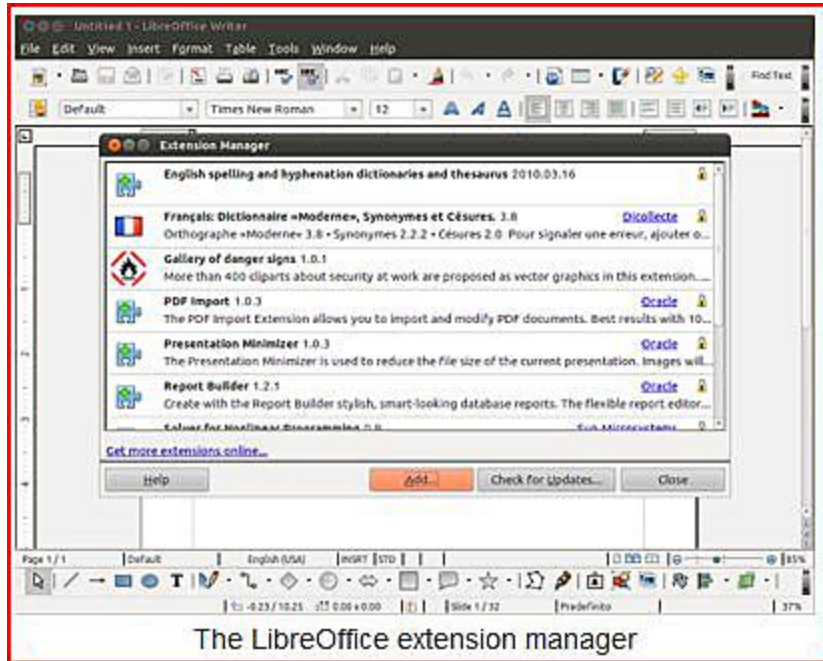

LibreOffice also comes configured with a PDF file creator, meaning you can distribute documents that you're sure can be opened and read by users of almost any computing device or operating system.

**PDF Import:** the PDF Import extension allows you to import and modify PDF documents. Results with 100% layout accuracy can be achieved with the "PDF/ODF hybrid file" format, which this extension also provides. A hybrid PDF/ODF file is a PDF file that contains an embedded ODF source file. Hybrid PDF/ODF files will be opened in LibreOffice as an ODF file without any layout changes.

## Enhance the Functionality of LibreOffice with Extensions

You can expand the functionality of LibreOffice even further with extensions available for download from our [LibreOffice Extension Center](#).

Extensions are software plug-ins that you install as extras to the standard LibreOffice download, and that add some kind of additional functionality to the suite, either to one particular application ([Writer](#), [Calc](#), [Impress](#), ...), or to every one of the applications.
